

TriMetal Adds A New Layer!

Now, high performance engine builders can enjoy the strength & durability of the legendary Clevite 77® TriMetal™ bearing construction coupled with the latest in coating technology right out of the box.

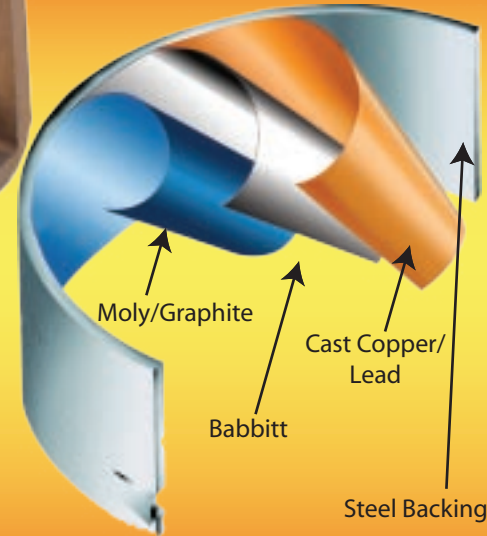

We're Excited, Aren't YOU?

Count on Clevite to be the first — with the best!

The exclusive Clevite 77® TriArmor™ engine bearings feature the industry's only moly/graphite treatment. This sophisticated blend, in a low friction PTFE polymer base, offers extraordinary protection and lubricity. Enhanced wear characteristics increase bearing life in race engines and high performance street engines.

- Reduced friction and drag, resulting in increased horsepower
- Protection during start-up
- Embedability to resist damage from debris
- Ability to withstand extreme temperatures and pressures
- Conformability for distressed or imperfect surfaces
- Extraordinary strength and durability

Clevite 77® TriArmor™ Engine Bearings

We're particular about parting lines...
 coating the parting lines would adversely affect bearing crush and we do not want to add extra work for you to sand it off, so we don't put it there!
